

MISSION

The mission of Holy Cross Services (HCS) is to bring hope, promote change and help children and adults live free, healthy and productive lives.

PHILOSOPHY OF TREATMENT

HCS provides substance use and co-occurring mental health disorder treatment through co-workers who are highly trained and committed to individual wellness, family stability and positive organizational change. HCS provides quality services by creating mutual benefit and balance between clients, co-workers and payer's needs.

HCS is a comprehensive substance use disorder treatment program that is supportive of Recovery Oriented Systems of Care (ROSC) principles. We believe in treating the whole person in a welcoming, safe and secure environment. We provide individualized services when, how and where they are needed.

Recovery is a process, not an event. There are often periods of doubt, fear and relapse. We help our clients learn to be adaptive, resilient, and to manage risk and protective factors to achieve recovery. Our treatment approach promotes a process of change to assist our clients in improving their own health and well-being, to live self-directed lives, and achieve their full potential.

HCS offers quality treatment, and offers the most important ingredient in recovery and wellness – HOPE!

Holy Cross Services is a 501c3 non-profit organization.

HOW WE SERVE

Holy Cross Services has been providing substance use disorder and mental health services since 1992. Our licensed programs provide a variety of services including:

- Detoxification
- Residential Substance Use Disorder Treatment
- Recovery Housing
- Outpatient Substance Use Disorder Services

All locations serve individuals with co-occurring substances use and mental health disorders, through simultaneous treatment models compatible with trauma informed care – a treatment structure and framework that involves understanding, recognizing, and responding to the effects of all types of trauma.

Our staff utilizes motivational enhancement therapy, the transtheoretical change model, and cognitive behavioral therapy.

Our clients participate in group, individual and family therapy.

Our treatment is comprehensive of the individual as a whole, not just the addiction.
